## ENDURANCE GOLD CORPORATION

### NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS FOR THE SIX MONTH PERIOD ENDED JUNE 30, 2009

*(Unaudited, prepared by management)*

---

#### 1. NATURE OF OPERATIONS AND GOING CONCERN

Endurance Gold Corporation (the "Company") was incorporated under the *Canada Business Corporations Act* on December 16, 2003 and continued into British Columbia on August 16, 2004. The Company is engaged in the exploration and development of mineral properties in North America and has not yet determined whether its properties contain ore reserves that are economically recoverable. Mining exploration business involves a high degree of risk. The recoverability of the amounts expended on mineral interests by the Company is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete exploration and development of its mineral properties and upon future profitable production or proceeds from disposition of its mineral interests.

These unaudited interim consolidated financial statements have been prepared by the Company's management in accordance with Canadian generally accepted accounting principles ("GAAP") on a basis consistent with those outlined in the Company's audited financial statements for the year ended December 31, 2008, except that they do not include all of the note disclosures required by Canadian GAAP for annual financial statements. They have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. They do not give effect to adjustments that would be necessary to the carrying values of assets and liabilities should the Company be unable to continue as a going concern. These adjustments could be material.

At June 30, 2009, the Company had a deficit of \$2,832,653 (2008 - \$904,786) and further losses are anticipated in the development of its business plan. The Company's ability to continue in operation is dependent on its ability to secure additional financing to fund planned exploration and its ongoing administrative expenditures. Although the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

#### 2. CHANGES IN ACCOUNTING POLICIES AND PRESENTATION

##### a) *Goodwill and intangible assets*

The Canadian Accounting Standards Board ("AcSB") issued CICA Handbook Section 3064 which replaces Section 3062, Goodwill and Other Intangible Assets, and Section 3450, Research and Development Costs. This new section establishes standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets. Standards concerning goodwill remain unchanged from the standards included in the previous Section 3062. The section applies to interim and annual financial statements relating to fiscal years beginning on or after October 1, 2008. Adoption of this standard did not have a material impact on the Company's consolidated financial statements.

##### b) *Recent Accounting Pronouncements*

###### *International financial reporting standards ("IFRS")*

In 2006, the AcSB published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008, the AcSB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

###### *Business Combinations, Consolidations, Non-Controlling Interests*

In January 2009, the CICA issued Handbook Sections 1582 *Business Combinations*, 1601 *Consolidated Financial Statements* and 1602 *Non-controlling Interests* which replace CICA Handbook Sections 1581 *Business Combinations* and 1600 *Consolidated Financial Statements*. Section 1582 establishes standards for the accounting for business combinations that is equivalent to the business combination accounting standard under IFRS. Section 1601 together with Section 1602 establishes standards for the preparation of consolidated financial statements. These Sections are applicable for interim and annual consolidated financial statements for fiscal years beginning January 1, 2011. Early adoption of these Sections is permitted and all these Sections must be adopted concurrently. The Company has not yet determined the impact of the adoption of these standards on its consolidated financial statements.

(d) Stock-based compensation

The fair value of options reported as compensation expense during the six month period has been estimated using the Black-Scholes Option Pricing Model using the following assumptions:

	<b>2009</b>	<b>2008</b>
<b>Description</b>		
Expected dividend yield	0.0%	0.0%
Risk free interest rate	2.04%	2.77%
Expected stock price volatility	221.1%	108.26%
Expected life of options	5 years	2 years
Weighted average fair value	\$0.0441	\$0.0682

Based on the foregoing, stock-based compensation expense of \$74,970 (\$10,230) was recorded for options that vested during the six months ended June 30, 2009. The off-setting credit was recorded in Contributed Surplus.

Option pricing models require the input of highly subjective assumptions, particularly as to the expected price volatility of the stock. Changes in these assumptions can materially affect the fair value estimate and therefore it is management's view that the existing models do not necessarily provide a single reliable measure of the fair value of the Company's stock option grants.

**7. FINANCIAL INSTRUMENTS AND RISK**

Financial instruments are classified into one of the following five categories under Canadian generally accepted accounting principles: held-for-trading, held to maturity investments, loans and receivables, available-for-sale financial assets and other financial liabilities. The Company classifies its cash and marketable securities as held-for-trading, receivables as loans and receivables, and reclamation bond as held-to-maturity. Accounts payable and accrued liabilities are classified as other liabilities, which are measured at amortized cost.

***Risk Management***

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

*Credit risk*

Credit risk is the risk of potential loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is limited to the carrying amount on the balance sheet and arises from the Company's cash, marketable securities, receivables and reclamation bonds.

The Company's cash, marketable securities, and reclamation bonds are held through a Canadian chartered bank and brokerage firm, which are high credit-quality financial institutions. The Company's receivables primarily consist of goods and services tax rebates due from the Federal Government of Canada.

*Liquidity risk*

Liquidity risk is the risk that the Company will not meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at June 30, 2009, the Company had a cash balance of \$235,391 to settle current liabilities of \$28,005. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms.

**7. FINANCIAL INSTRUMENTS AND RISK (cont'd)**

*Market risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and foreign exchange rates.

(i) *Interest rate risk*

The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade short-term certificates of deposits issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

(ii) *Foreign currency rate risk*

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The Company funds certain operations, exploration and administrative expenses in the United States of America by using the US dollar currency from its Canadian dollar bank accounts. Management believes the foreign exchange risk derived from currency conversions is insignificant and therefore does not hedge its foreign exchange risk.

*Sensitivity analysis*

The carrying value of cash, marketable securities, receivables, reclamation bonds, accounts payable and accrued liabilities approximate their fair values due to the relatively short periods to maturities of these financial instruments.

Based on management's knowledge of and experience in the financial markets, management does not believe that the Company's current financial instruments will be materially affected by credit risk, liquidity risk or market risk.

**8. SUPPLEMENTAL DISCLOSURES WITH RESPECT TO CASH FLOWS**

Stock-based compensation	74,970	10,230

The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.
