

ENDURANCE GOLD

CORPORATION

Advancing the Reliance Project

Company Overview

Endurance Gold is a precious metals exploration and development company focused on the acquisition, exploration and development of highly prospective North American mineral properties.

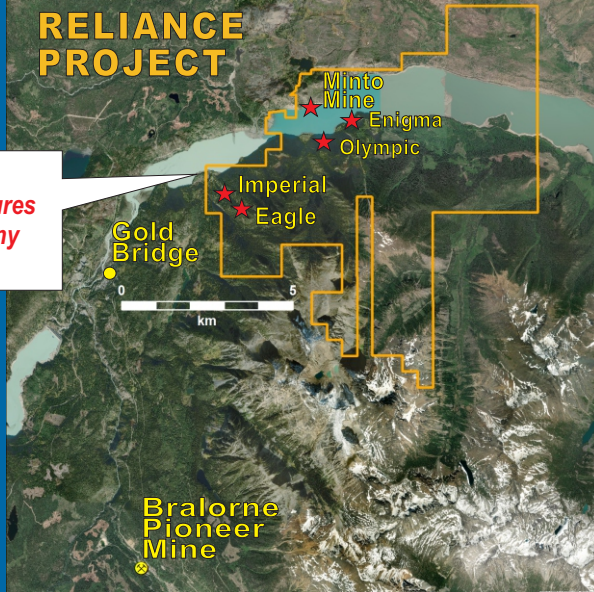

Our exploration focus is to advance the Reliance Gold Project, located near Gold Bridge B.C. in the historic Bralorne - Pioneer gold camp.

RELIANCE PROJECT, Gold Bridge, B.C.

"Epizonal" Orogenic Gold

7 Subparallel Regional Structures & Gold - Antimony Prospects

4 hour drive north of Vancouver

2021-24 Diamond Drilling

108 Drill Holes Completed
Assays Pending on 10 Holes

2020 - 2022 RC Drilling

84 Drill Holes Completed

Eagle DDH

- 5.80 gpt Gold / 23.0 m
incl. 8.52 gpt Gold / 12.7 m
- 7.87 gpt Gold / 7.6 m
- 17.28 gpt Gold / 4.0 m
- 15.7 gpt Gold / 24.8 m
incl. 26.96 gpt Gold / 4.1 m
- 8.62 gpt Gold / 24.4 m
incl. 17.02 gpt Gold / 4.3 m
- 8.06 gpt Gold / 13.5 m
- 4.16 gpt Gold / 30.0 m
incl. 8.31 gpt Gold / 11.9 m
- 3.05 gpt Gold / 139.0 m
incl. 12.85 gpt Gold / 12.9 m

Imperial - Lower Imperial

- 8.98 gpt Gold / 9.3 m
incl. 12.44 gpt Gold / 6.0 m
- 17.28 gpt Gold / 4.2 m
- 7.93 gpt Gold / 7.4 m
incl. 14.13 gpt Gold / 4.0 m
- 8.47 gpt Gold / 24.9 m
incl. 16.27 gpt Gold / 10.5 m
- 6.80 gpt Gold / 4.3 m
- 7.18 gpt Gold / 8.3 m
incl. 28.08 gpt Gold / 1.7 m

DDH Success Statistics

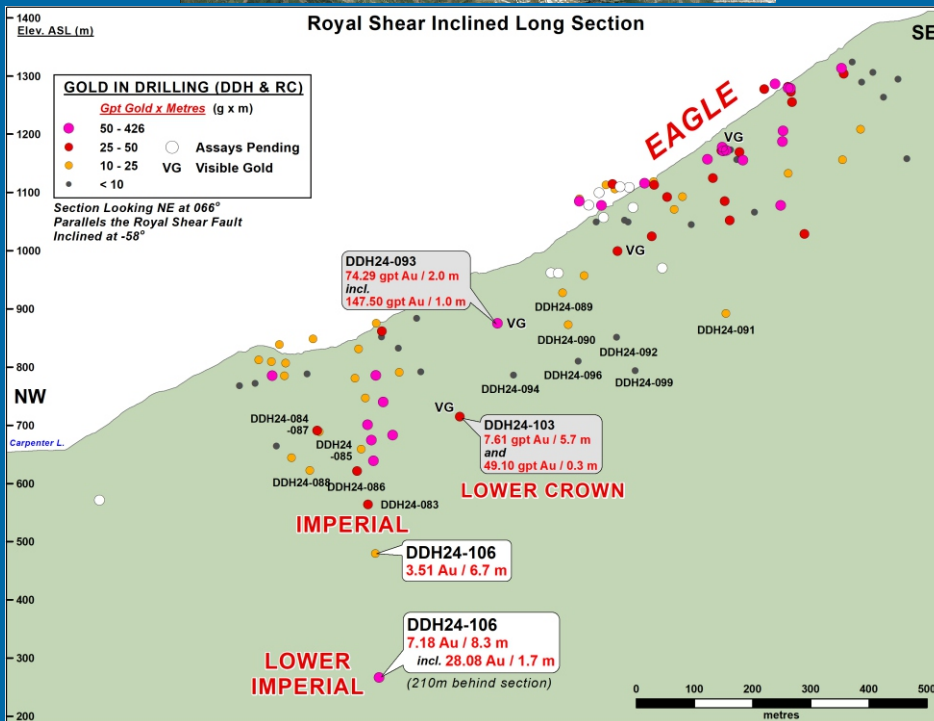

63 of 98 holes > 10 gram x m
17 of 98 holes 70 - 426 gram x m

Gold mineralized zones and the majority of drill intersections < 75 m below surface.

Associated with multi-phase mineralized breccia.

Homogeneously mineralized over wide drilled intervals between 3 and 30 m.

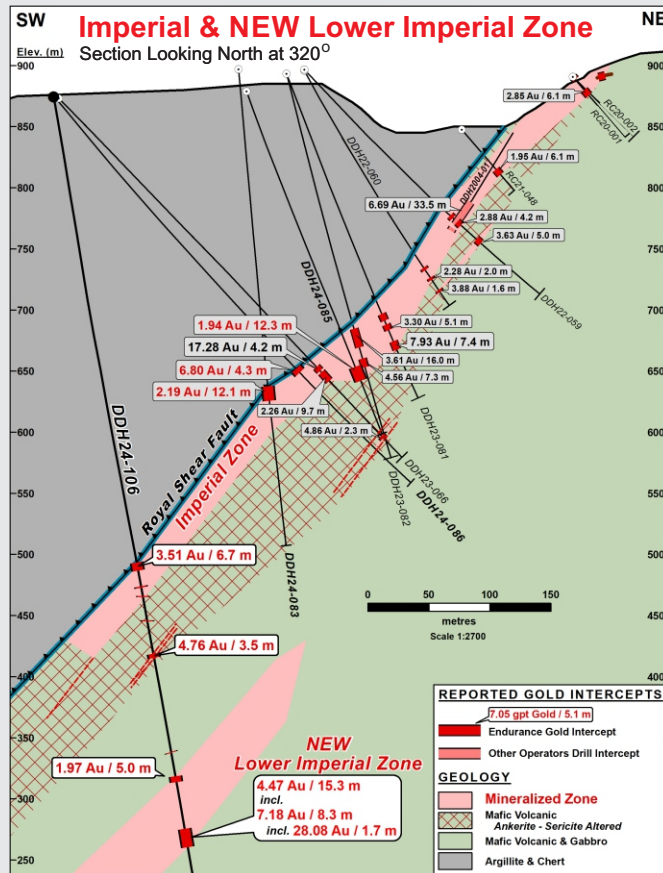

Indicates potential to be amenable to open pit and underground.

Reliance Project, Gold Bridge, B.C.

Orogenic Gold (100%)

- 10 km NE of Bralorne - Pioneer Mine with +4 million ounces of gold production from camp.
- An Epizonal (shallower) equivalent of the Bralorne Orogenic Camp.
- Mineralization is related to silicification and sulphidization in a wide sericite - ankerite alteration zone along the regional Royal Shear over at least 2 km strike length and 1.1 km vertically.
- Multiple road accessible sub-parallel structural host targets.
- Eagle Zone 550 x 150 m area averaging 5.17 gpt Gold over 9.6 m in over 70 RC & DDH with assays to date

2024 Diamond Drill Core

Management

ROBERT T. BOYD, P.Geo. President, CEO & Director

Senior mining executive with 45 years of experience in exploration, executive-level management, corporate finance and corporate governance. Serves on several corporate and association boards.

TERESA CHENG CFO & Corporate Secretary

Former CFO of Atna Resources Ltd., until 2005. Over 25 years in the mineral exploration industry. Strong familiarity with financial and regulatory requirements.

DARREN O'BRIEN, P.Geo. Vice President Exploration

30 years experience in the gold and base metal mining industry with major mining companies and junior explorers. Has been a consulting geologist for several junior mining companies offering QP, project evaluation, and exploration management.

Board of Directors

H. ROSS ARNOLD

RICHARD GILLIAM

J. CHRISTOPHER MITCHELL, P.Eng.

ALEX J. DAVIDSON

Elephant Mtn. Project, Central Alaska Reduced Intrusive Hosted Gold (100%)

- Road accessible in the Tintina Gold Belt, near Manley Hot Springs.
- Reduced Intrusive hosted Stockwork and Shear hosted Gold.
- Seven priority targets over 12 km – 6 targets warrant drilling.
- **South Zone** – gold-in-soil anomaly 1,400 x 250 m - DDH returns **4.0 gpt gold / 4.6 m**. – untested high priority IP chargeability anomaly.
- **North Zone** – DDH returns **0.4 gpt gold / 147.1 m**. - Large associated IP chargeability anomaly.
- **Trout Target** – Grab samples up to 23.1 gpt gold. 1,000 x 300 m >100 ppb soil anomaly +25 m wide shear zone – Soil grid includes **high gold-in-soil values up to 2,330 and 2,100 ppb gold**. Trench: 0.510 gpt gold over greater than 12 m.
- Further drilling warranted. **Available for option.**
