

RELIANCE PROPERTY, B.C. 2020 - 2025 Drill Penetration Locations

Royal Shear Inclined Longitudinal Section

Elev. ASL (m)

1300

Section Looking NE at 066°
Parallels the Royal Shear Fault
Inclined at -58°

GOLD IN DRILLING (DDH & RC)

Gpt Gold x Metres (g x m)

- 50 - 426
- 25 - 50
- 10 - 25
- < 10
- Assays Pending
- VG** Visible Gold

"The Company warns that the use of Gram x Metres is for visual presentation only on this longitudinal section. It is not meant to represent any metal accumulation or mineral resource tonnage."

"Gram x Metres is calculated by multiplying the composited gold grade (gpt) by the intersected drill length (m) of the reported assay composite. Gram x Metres is not a standard unit of measure and is non-compliant with NI 43-101 disclosure standards."
