ENDURANCE GOLD CORPORATION

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the nine-month period ended September 30, 2025

1. NATURE OF OPERATIONS AND GOING CONCERN

Endurance Gold Corporation (the “Company”) was incorporated under the *Canada Business Corporations Act* on December 16, 2003 and continued into British Columbia on August 16, 2004. The head office and principal address of the Company is at Suite 1212, 666 Burrard Street, Vancouver, British Columbia, V6C 2X8. The Company’s registered address and records office is Suite 1600, 925 West Georgia Street, Vancouver, British Columbia, V6C 3L2.

The Company is engaged in the exploration and development of mineral properties in North America and has not yet determined whether its properties contain ore reserves that are economically recoverable. The Company has not generated revenue from operations and will need to seek additional financing to meet its exploration and development objectives. The mineral property exploration business involves a high degree of risk. The recoverability of the amounts expended on mineral interests by the Company is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its mineral properties and upon future profitable production or proceeds from the disposition of its property interests.

These unaudited condensed interim consolidated financial statements (“Condensed Interim FS”) have been prepared on the basis that the Company will continue as a going concern, which assumes that the Company will be able to meet its commitments, continue operations, and realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses since inception and has no recurring source of revenue. At September 30, 2025, the Company had an accumulated deficit of \$11,437,096 and net working capital of \$1,673,647 which was inclusive of marketable securities with an estimated fair value of \$34,696. These material uncertainties cast significant doubt upon the Company’s ability to continue as a going concern.

The Company’s continuation as a going concern is dependent upon successful results from its exploration and evaluation activities, its ability to attain profitable operations to generate funds and/or its ability to raise equity capital or borrowings sufficient to meet its current and future obligations. Although the Company has been successful in the past in raising funds to continue operations, there is no assurance it will be able to do so in the future.

These unaudited Condensed Interim FS do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary were the going concern assumption inappropriate, and these adjustments could be material.

2. BASIS OF PREPARATION

(a) *Statement of Compliance*

These unaudited Condensed Interim FS have been prepared in accordance with IFRS Accounting Standards (“IFRS”) applicable to the preparation of interim financial statements, including International Accounting Standards 34 (“IAS 34”) *Interim Financial Reporting*. These unaudited Condensed Interim FS include the financial statements of the Company and its wholly-owned subsidiary.

These unaudited Condensed Interim FS were authorized for issue by the Audit Committee and Board of Directors on November 26, 2025 and should be read in conjunction with the Company’s audited consolidated financial statements for the year ended December 31, 2024.

3. MATERIAL ACCOUNTING POLICY INFORMATION

The accounting policies applied in these unaudited Condensed Interim FS are consistent with the accounting policies disclosed in Notes 2 and 3 of the Company’s audited consolidated financial statements for the year ended December 31, 2024.

ENDURANCE GOLD CORPORATION

NOTES TO THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the nine-month period ended September 30, 2025

4. MARKETABLE SECURITIES

Marketable securities consist of equity securities of an entity or entities over which the Company does not have control or significant influence.

	September 30, 2025	December 31, 2024
Fair value, beginning of the year	\$ 1,012,598	\$ 400,873
Proceeds from sales, net of commission	(1,920,551)	(32,259)
Gain (loss) on sale of marketable securities	280,841	(20,391)
Unrealized gain on marketable securities	661,808	664,375
	\$ 34,696	\$ 1,012,598

With its main business focus being mineral exploration, the Company does not generally intend to hold its investments in marketable securities for long-term periods, and accordingly these are classified as current assets. All of the Company's investments in marketable securities are also classified as fair value through profit and loss ("FVTPL").

9. FINANCIAL INSTRUMENTS AND RISK

Fair value

IFRS 7 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

As at September 30, 2025, the Company's financial instruments are comprised of cash and cash equivalents, marketable securities, receivables excluding goods and services tax, B.C. mining exploration tax credit receivable, and accounts payable and accrued liabilities. The carrying value of receivables, and accounts payable and accrued liabilities approximate their fair values due to the relatively short periods to maturity of these financial instruments.

Financial instruments measured at fair value on the statements of financial position are summarized in levels of fair value hierarchy as follows:

September 30, 2025

Assets	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 1,270,681	\$ -	\$ -	\$ 1,270,681
Marketable securities	34,696	-	-	34,696

Risk Management

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of potential loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is limited to the carrying amount on the statement of financial position and arises from the Company's cash and cash equivalents, marketable securities, receivables and reclamation bonds.

The Company's cash and cash equivalents and marketable securities are held through a Canadian chartered bank and brokerage firms, which are high-credit quality financial institutions. The Company's receivables primarily consist of exploration tax credit due from the B.C. Government and goods and services tax rebates due from the Government of Canada.

Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2025, the Company had a cash and cash equivalents of \$1,270,681 to settle current liabilities of \$687,190. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk may arise from changes in market factors such as interest rate, foreign exchange rate and price risks.

(a) Interest rate risk

The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade short-term certificates of deposits issued by its banking institution. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its bank.

9. FINANCIAL INSTRUMENTS AND RISK – *continued*

(b) Foreign currency rate risk

While the Company is domiciled in Canada and its capital is raised in Canadian dollars, a portion of its business is conducted in the United States of America. As such, it is subject to risk due to fluctuations in the exchange rate between the Canadian and US dollars. Management believes the foreign exchange risk derived from currency conversions is insignificant and therefore does not hedge its foreign exchange risk.

(c) Price risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate or foreign currency risks. At September 30, 2025, the Company had marketable securities with a fair value of \$34,696. A $\pm 10\%$ change in the share prices would affect the Company's consolidated financial statements by approximately \$3,470.

The net realizable values of the Company's marketable securities are also subject to impairment resulting from insufficient market liquidity. The extent of such potential impairment is not readily determinable.

10. CAPITAL MANAGEMENT

The Company manages its cash and cash equivalents, and common shares as capital. The Company manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the on-going business objectives including, but not limited to, pursuing the exploration of its exploration and evaluation assets, funding of future growth opportunities, and pursuit of new acquisitions; and
- to maximize shareholder return through enhancing share value.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company manages its capital structure by issuing new shares, adjusting capital spending or disposing of assets. In addition, management of the Company's capital structure is facilitated through its financial and operational forecasting processes. The forecast of the Company's future cash flows is based on estimates of capital and operating expenditures, and other investing and financing activities. The forecast is regularly updated based on changes that the Company views as material to the accuracy of the forecast.

The Company's capital management objectives, policies and processes have not been changed over the period presented. The Company is not subject to any externally imposed capital requirements.

11. SEGMENTED INFORMATION

The Company operates in one reportable operating segment, being the exploration and development of exploration and evaluation assets in Canada and the United States.
